

The Next Generation of Cancer Treatment: **IMMUNOTHERAPY IN BC**

Join us to learn how your own immune system can be super-charged to eliminate cancer.

The Saunders family and WestShore Chamber of Commerce invite you to our upcoming Info-Mixer at Saunders Subaru, to showcase how researchers at the BC Cancer Agency's Deeley Research Centre in Victoria are working to bring revolutionary cancer treatment to British Columbians.

This is a wonderful opportunity to connect with other local business people, enjoy appetizers and non-alcoholic beverages, and learn how this ground-breaking work by the BC Cancer Agency will benefit everyone we know touched by cancer.

Opened in 2003, with generous philanthropic support from the Victoria community and beyond, The Deeley Research Centre has become internationally-recognized for its research.

Space is limited—RSVP by January 14 to Cynthia at 250.519.5747 or cynthia.durand-smith@bccancer.bc.ca.

January 20, 2016
5:30–7:00 pm
